Iteration 2

By: Harry, Corey, Paige, and Spenser

Summary

- Client and Info -

- Intertwined Finance -

  - Course Management System -

    - Managing Courses -

    - Managing Course related Units -

    - Managing Course related Sections -

    - Managing Course related Lessons -

    - Managing Course related Quizzes

Mentor Feedback

- Our mentor suggested few styling changes to make the content more digestible. This feeback was mainly referring to our quiz page which had modals that were too small and obtuse.

Client Feedback

- Styling Changes on adding quiz modal

- Styling changes on editor screen

- A way to directly go to the editor page after creating a new lesson

Iteration 2 Features

- Backend to Frontend connection

- Uploading JSON data

- Less expressive styling

- Quiz Page

  - Editing, adding, deleting, and viewing

Retrospection

- What does each team member think about this iteration?

  - Harry: Iteration 2 was a big step in the right direction by syncing backend data to the frontend and creating helpful new features.

- What do you think about making your software more quality by adding the other properties (modularity, testing, clean code etc.)?

- How do you plan to approach iteration 3?

  - For iteration 2 we plan to make the already existing functions polished and creating proper authentication
